

Enhance your data practices with our Foundational Data Model Assessment.

6 reasons you should review your Foundational Data Model.

- 1 Discrepancies in data across different systems and departments.
- 2 Data silos are hindering the sharing and integration of data.
- 3 Financial or HCM data structures are overly complex and difficult to manage.
- 4 Regulatory changes and increasing compliance demands.
- 5 Data model does not scale effectively.
- 6 Reduction in support staff.

Make the most of your data sets.

Stakeholders can have a hard time telling how shedding outdated structures, implementing smart coding, or transitioning static data sets to dynamic data sets will shape the future. The Groove's Foundational Data Model (FDM) Assessment affords stakeholders that visibility while helping you maximize your enterprise-wide capabilities and laying the foundation for a more refined, dynamic structure.

Evaluate how well your data structures are being optimized.

The Groove's Foundational Data Model Assessment involves a comprehensive analysis of your data systems, structures, and processes. From the assessment, our team of experts can identify any gaps and inefficiencies in your data practices and offer easy-to-implement recommendations for optimizing data management.

Key deliverables

To-be Foundational Data Model

- Access a Foundational Data Model that illustrates the transition from legacy to future states and harnesses the capabilities of dynamic data sets.
- Receive recommendations on change impacts.

Comprehensive assessment of data environment

- Receive a comprehensive analysis of data models and organizational structures.
- Discover new dimensional attributes to support future growth.

Change management training

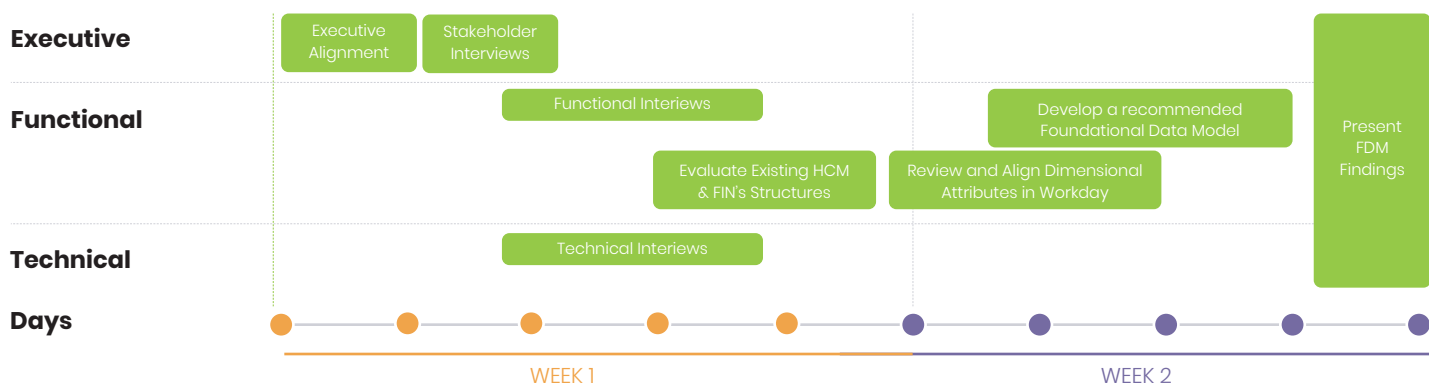

- Receive pre-deployment guidance on enhancements to training materials to increase understanding of key Workday concepts.

Proof of concept built in Workday

- See your future process with your data in Workday's aligned structures and scenarios directly in a Workday tenant environment.

Assessment timeline

The Groove's Foundational Data Model Assessment is a two-week engagement as defined by the services below.

Why The Groove
